

CVE's

Physiotherapy for Kids

Are you concerned about the physical development of your child, or just want to know if your child is developing towards their milestones? Schedule an assessment with our Pediatric Physiotherapist today!

- Assess and treat babies and children that are showing a delay in their developmental milestones
- Help facilitate functional movement patterns with manual techniques, provide therapeutic strengthening and stretching exercises, and teach parents how to position/carry/place toys to help encourage independent movement.
- Recommend and prescribe equipment such as walkers, ankle braces, and adapted bicycles.
- Focus on optimizing movement and function for babies and children who have been born with physical disabilities.
